Intranets - Sharing Knowledge and Information

Intranet solutions by ClearPeople

ClearPeople designs, develops and implements intranet solutions using Microsoft SharePoint. Intranets are one of the most valuable assets for any organisation. They help people do their jobs more efficiently by empowering employees to collaborate and easily share information.

What are the benefits?

- Improve communication to and amongst employees
- Consistent corporate image
- Centralised area for sharing knowledge and information as well as encouraging co-operation
- Eases user workloads
 - o Users can quickly find and access information from anywhere within the company workstations, increasing their ability to perform their jobs faster and more accurately
- Reduces risk of information being lost

Why ClearPeople?

If you are interested in boosting your intranet's internal profile with design that reflects your organisation's culture and users - look no further. ClearPeople's creative division, Loud & Clear, designs resounding websites, intranets and extranets.

ClearPeople focuses on designing and implementing user-friendly and easy to update/manage intranet solutions. An intranet should not only look and behave in a consistent way, but also be easily distinguishable from the organisation's public-facing website.

What our customers say

"The SharePoint 2010 intranet built and designed by ClearPeople has enabled our employees to access an exciting global outlet to share latest news and information. Aside from the superior creative and technical delivery, I have been impressed with the level of communication ClearPeople maintained throughout the project. They have upheld their commitment to our organisational objectives and went beyond their remit to ensure the overall project was a success."

Francis Hart, SOE, SEGA Europe Ltd.
