## ClearPeople

### Extranet Jumpstart Programme

#### What is Extranet Jumpstart?

The Extranet Jumpstart Programme is an intensive workshop funded by Microsoft and designed to provide customers requiring an extranet portal with a free 2-day ADS (Architecture Design Session). The programme will show qualifying customers how a SharePoint solution can be built for their external facing business needs.

Existing SharePoint customers can extend the value of their SharePoint installation by using the platform to support an extranet, while new users can explore its potential applications and benefits. ClearPeople will deliver a comprehensive workshop and write-up, which includes an estimate of costs for a pilot implementation and solution delivery.

#### What is the benefit?

Organisations that participate in the Extranet Jumpstart Programme will benefit from two full days of complementary consulting with one or more of ClearPeople's SharePoint consultants. Each member of the SharePoint consulting team is Microsoft Certified and has 5 or more years of experience implementing SharePoint. They will offer the customer insight into best practices, common pitfalls and making the most of extranet implementations. The programme is designed to ensure that your extranet project is well-thought through and will provide ROI to your organisation.

#### Some of ClearPeople's SharePoint Customers:

#### Why ClearPeople?

ClearPeople has implemented SharePoint extranets for a number of organisations that need to provide their clients with secure access to a portal environment. This experience, combined with ClearPeople's three Microsoft Gold Competencies in Digital Marketing, Portals & Collaboration, and Content Management are among the reasons we were selected to partake in this programme.

We are a well-known specialist provider of SharePoint services and solutions and have worked with organisations in a wide range of sectors including the Legal & Professional Services, Charity, Public, Property, Financial Services, as well as Utilities and Transport.

#### What our customers say:

*"By working with ClearPeople, Stena has been able to use SharePoint to become a more efficient and communicative organisation. We relied on their expertise to lead the project and it was apparent that they were a highly skilled and competent team."*

- Pär Persson, Manager Business Technology Stena

*"One of the reasons that our project was a success overall was that we worked with ClearPeople. The team was incredibly dedicated to make it work for us in a really short time."*

- Simon Gilhooly, Global Infrastructure Manager Linklaters
