

Atlas ConneX Training Pack

Microsoft 365 site and workspace proliferation creates major governance and findability challenges. Valuable institutional knowledge easily fragments across uncontrolled environments. Corporate knowledge is rapidly lost in these workspaces and is almost never recovered.

Though ConneX training is included in an Atlas rollout, clients often realize the full breadth of their Microsoft 365 governance challenges only after deployment. Subsequently, stakeholders need an in-depth workshop to strategize optimized ConneX deployment for comprehensive knowledge oversight.

The Offering

The ConneX training pack is an in depth and hands-on, trainer-led, training workshop that covers the following:

- ConneX capabilities for streamlining Microsoft 365 governance.
- Site and workspace governance concepts.
- Optimizing ConneX configuration and permissions.
 - Creating workspaces:
 - Taxonomy: what is it - why is it so important
 - Go through every configuration setting in detail
 - Editing workspace settings.
 - Find workspaces using search and filters.
 - Atlas-ifying older workspaces to bring them under the control of ConneX and recover the lost knowledge.
- Building confidence in using of ConneX.
- Use case examples of issues that could be avoided by using ConneX.
- Enablement resources to drive adoption, including ConneX Quick Reference Guides and links to ConneX training videos.
- Follow-up support several weeks post-workshop.

The Business Value

Regain oversight of your Microsoft 365 environment - enhancing administrator efficiency, user experience, and information findability. Unify scattered knowledge to inform better decisions.

The Investment

How much does it cost?

£4,000

\$5,000

€5,000

How much time should you allocate?

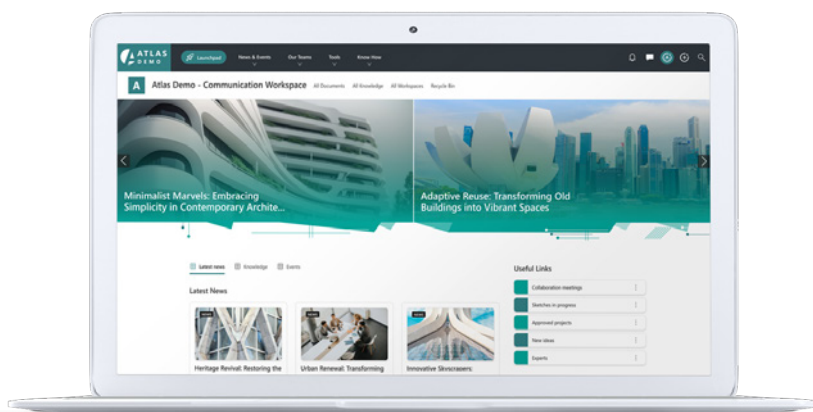

We'll need a half day for the interactive workshop.
Attendees should also allocate additional time to practice concepts.

What resource investment will it entail from your side?

Up 10 people per group (to ensure full engagement and retention)
