

Atlas Design Refresh

Your intranet is more than a tool, it's the digital embodiment of your workplace.

There is clear evidence that regularly adding some new sparkle to your intranet and digital workplace experience can completely rejuvenate the user experience, drive more user engagement, and help highlight features for which you'd like to drive adoption.

The challenge, as we all know, is that there is rarely enough time to undertake this type of work, which often requires multiple skill sets.

We understand the challenges! With that in mind we've created this design refresh package that is easy to consume and, we believe, will help keep your users' experience fresh and positive.

The Offering

We'll run a quick discovery workshop with you to understand what's important to you and your users, your latest branding guidelines, and any new functionality you'd like to emphasize to drive user adoption.

We'll agree which area of Atlas you'd like to focus on and pour our efforts into making that as attractive and useful as possible. You can choose from:

- ☒ Workspace home landing page
- ☐ Departmental landing page
- ☐ Any other site page
- ☐ A template

Before we present our shiny new design refresh, we'll work with our technical experts who'll check that Atlas functionality is used efficiently and that there are no potential technical dead ends based on our current roadmap. In this way you can be sure that you'll have an attractive user experience backed up by the best technical implementation possible.

Why Refresh Your Intranet Design?

Boost engagement: Protect your investment by keeping users engaged and excited about their digital workplace experience.

Stay current: Technology evolves rapidly. A design refresh ensures that you're utilizing the best and most up-to-date features, safe in the knowledge that they're supported in the current roadmap.

Free your own time to focus on other matters: we know that one of the biggest challenges is lack of time, so let's remove that blocker to progress.

Drive productivity: Emphasize functionality or areas of the platform where you'd like to drive engagement to deliver business value. A design that directs users to key functionality in an attractive way is often better and more cost-effective than multiple rounds of training.

The Investment

How much does it cost?

£4,000

\$5,000

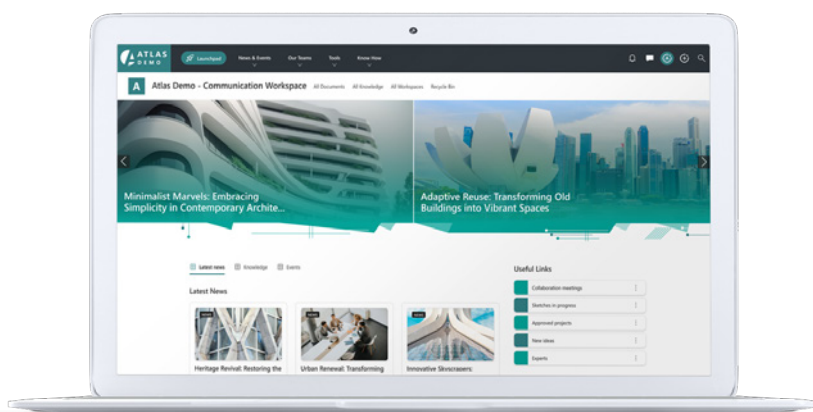

€5,000

How much time do I need to allocate?

The discovery workshop will take 1 – 1.5 hours of your time and you'll need to allocate time to review ideas and suggestions from our team, but, other than that, you can focus your efforts elsewhere.

Here to Help

Contact us today to start the conversation about your design refresh. Together, we'll create a space that your employees will love to use, day in and day out.
